Rubber Mallets

We have manufactured over 1,000,000 pieces of standard sized rubber mallets. These mallets are completely manufactured in the United States and come with lifetime warranties. Our mallets are bounce-resistant as their hammer heads are made from specially formulated rubber. This feature makes them highly efficient in transferring energy to the target.

Rubber mallets are available in black as well as non-marking grey. Made from genuine hickory wood, the handles are attached firmly to the rubber heads through additional chemical bonding. We can also mark the handles of your mallets for private labeling. These rubber mallets are also sold as two-piece shelf packs. In addition to the rubber mallets, we manufacture and stock vibratory feeder feet as well.
